About me

I am a graduate of the Indonesian Muslim University with a specialization as a Frontend Web Developer. I have experience in building attractive and responsive user interfaces using the latest technologies such as ReactJS and its Ecosystem. Also, I'm always passionate about finding new ways to improve website quality and performance. I believe that strong technical ability must be accompanied by good interpersonal skills, so I always strive to be a collaborative team member, communicate clearly, and be quality results oriented. I'm excited to continue learning and developing my skills, and I look forward to contributing to building an impressive and useful product."
